EXPERIENCE

MetEngine — Co-Founder & CTO

Feb 2025 – Jun 2026

- Built an automated copy-LPing engine on Solana that drove **\$4.3M+** in yield for **8.5K+** users and scaled total volume past **\$114M+**.
- Led the backend end-to-end: high-throughput data pipelines and real-time analytics on Solana (Node.js, ClickHouse, Redis) in production on AWS, with a real-time indexer across Meteora and other DeFi protocols.
- Built x402-metered data APIs serving Polymarket, Hyperliquid, and market-making feeds, plus a Chrome extension with richer trading analytics.
- Raised **\$375K** pre-seed from Colosseum, Balaji Srinivasan, and MonkeFoundry; drove the product 0 → 1 across architecture, hiring, and go-to-market.

WalletConnect — DevRel / Solutions Engineer, WalletKit

Nov 2024 – May 2025

- Embedded with **Jupiter, Backpack, and MetaMask** to integrate WalletKit and add Solana support, debugging their integrations directly.
- Technical point of contact for wallet clients — triaged issues, reproduced bugs, and turned customer feedback into product fixes.
- Wrote docs, integration guides, and sample apps; onboarded wallets to WalletConnect Certified.

Huddle01 — DevRel Engineer

Apr 2023 – Aug 2024

- Drove **200+** projects to integrate the SDK through docs, sample apps, and hands-on support; contributed to the core SDKs.
- Built FarHouse, an audio-spaces client on Farcaster with in-app tipping — **30K+** MAUs; grew the Discord community from 2K to **13K+**.

Google Summer of Code '22 — Open-Source Contributor, Oppia Foundation

2022

- Merged **30+** PRs improving accessibility in the Oppia Android app.

PROJECTS

Stackit — Theme-based investable baskets of tokens with fund analytics and referrals.

- Won **2nd prize** at Solana Hacker House; received a Superteam grant.

Farview.id — Personalized profile pages for Farcaster & Base users — **6K+** users, **12K+** Frame interactions.

- Won the **Social track** at Base Onchain Summer Buildathon; Base builder grant.

Capital Finance — Cross-chain yield aggregator on the Superchain, auto-routing funds to the highest yield via Chainlink CCIP.

- Won **Best Trading App on Base** and Best Use of Goldsky at ETHGlobal SuperHack.

WiseBets — Multi-chain opinion-trading platform with shareable Frames, built on Chainlink CCIP.

- Won **zkSync, Polygon & Scroll prizes** at Chainlink Block Magic.

SKILLS

Languages: TypeScript, JavaScript, Solidity, Python, Rust (familiar)

Backend & Data: Node.js, REST APIs, data pipelines & real-time analytics, PostgreSQL, ClickHouse, Redis, Supabase, Firebase, AWS

Web3: Solana, EVM, Ethers.js, Web3.js, SolanaKit, Wagmi/Viem, WalletConnect, Chainlink CCIP, Dune

Solutions & Integration: API & SDK integration, integration debugging, customer onboarding & support, technical docs, sample apps & demos, community & speaking

ACHIEVEMENTS

- **2nd prize**, DeFi track, Colosseum Breakout Hackathon — out of **1,412 projects** from 10K+ builders; selected for **Colosseum Accelerator Cohort 3** (YC for Solana).
- **ETHGlobal finalist** and winner of **30+ hackathons**; builder grants from Base and Superteam.
- Speaker at **25+ conferences**; mentored at ETHIndia and HackFS.
